

A Family Tree For Me
Trace your roots without the digging

Ancestral Imagery

Throughout this part of the A Family Tree For Me services, we will endeavour to bring to you an interesting and attractive way to get closer to your families ancestry. Here at A Family Tree For Me we believe that because of our central location within the United Kingdom that we can offer the following service of Ancestral Imagery. What we mean by Ancestral Imagery is that we will receive from you, the client information regarding the area or location that your family were from in history. We will also request from you as to what you want us to photograph regarding your family.

- **Location Imagery**

- Because of the history involved in the in the UK there may be a good chance that your ancestral home will still exist to this day. Sometimes there is the unfortunate event of being unable to find the home because it no longer exists, in that event we would under the instruction of you the client give you the opportunity of researching for an image of the area or location and the opportunity for taking an image of what the area is like at this moment in time. This would we believe give you an insight into the area that your ancestors came from and it would also give greater understanding of their lives.

- **Graveyard Imagery**

- The great consensus here at A Family Tree For Me is that Graveyards are an amazing place to find out more about your ancestry. A graveyard is the most accessible source for the study of the history of a local community and possibly your own family. Because of the detailed information they contain, gravestones provide an ideal launch pad for any genealogical investigation.

We can tailor our location, graveyard imagery/photography that will enhance any research package you choose. Photographs/Images, for your research interests start at £35 for locations within 25 miles of Sheffield, South Yorkshire, UK. For locations further afield travelling expenses are added (Travel Costs are half the hourly rate) and hotel expenses where appropriate.

If these services are of interest to contact us by completing the Imagery/ Photography form, you can use the contact form link below, where you will be able to specify your personal requirements, if we need any other information we will discuss these requirements with you and give you a firm quotation and await your confirmation before we proceed.
